^a The margin of error surrounding the reported mean forms a 95% confidence interval, a range of values with a 95% likelihood to contain the true population mean.

^b Standard deviation is a measure of the average amount the individual scores deviate from the mean of all the scores in the distribution

^c This statistic represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance

^d Effect size is calculated by subtracting the comparison group mean from the school mean, and dividing the result by the standard deviation of the comparison group

^a The margin of error surrounding the reported mean forms a 95% confidence interval, a range of values with a 95% likelihood to contain the true population mean.

^b Standard deviation is a measure of the average amount the individual scores deviate from the mean of all the scores in the distribution

^c This statistic represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance

^d Effect size is calculated by subtracting the comparison group mean from the school mean, and dividing the result by the standard deviation of the comparison group

^a The margin of error surrounding the reported mean forms a 95% confidence interval, a range of values with a 95% likelihood to contain the true population mean

^b Standard deviation is a measure of the average amount the individual scores deviate from the mean of all the scores in the distributor

^c This statistic represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance

^d Effect size is calculated by subtracting the comparison group mean from the school mean, and dividing the result by the standard deviation of the comparison group
